# Comparison of yours and other companies' carbon footprints

#### Absolute values

| Comparison | Energy Usage | Waste   | Business Travel | Total    |
|------------|--------------|---------|-----------------|----------|
| Rotsommer  | 16773.6      | 1740.0  | 11088.0         | 29601.6  |
| Median     | 2791.26      | 910.2   | 4851.0          | 8552.46  |
| Difference | 500.93 %     | 91.17 % | 128.57 %        | 246.12 % |

## Shares of carbon footprint components

## Recommendations

You have high energy related emissions, 16773.6 kgCO2. You can use this tips to reduce them:

- 1. Conduct an energy audit. Pinpoint high-consumption areas and reduce wasteful practices.
- 2. *Insulate and retrofit.* Improve building insulation and consider energy-efficient retrofits like double-glazed windows.
- 3. Electrify transportation. Replace fossil-fuel-powered generators or vehicles with electric alternatives.

Energy related emissions state benchmarks

| Level    | Left limit, kgCO2 | Right limit, kgCO2 |
|----------|-------------------|--------------------|
| Low      | 0                 | 5000               |
| Moderate | 5000.1            | 15000              |
| High     | 15000.1           | ∞                  |

You have moderate waste related emissions, 1740.0 kgCO2. You can use this tips to reduce them:

- 1. Boost recycling. Expand recycling initiatives and educate employees on proper waste segregation.
- 2. Reduce single-use items. Eliminate disposable plastics in favor of reusable or biodegradable options.
- 3. *Implement waste reduction policies*. Encourage double-sided printing, paperless offices, and composting.

## Waste related emissions state benchmarks

| Level    | Left limit, kgCO2 | Right limit, kgCO2 |
|----------|-------------------|--------------------|
| Low      | 0                 | 1000               |
| Moderate | 1000.1            | 3000               |
| High     | 3000.1            | ∞                  |

You have moderate travel related emissions, 11088.0 kgCO2. You can use this tips to reduce them:

- 1. Optimize travel plans. Plan efficient routes and consolidate trips to minimize fuel use.
- 2. Shift travel modes. Use public transport, carpooling, or cycling for shorter distances.
- 3. Adopt hybrid options. Use hybrid vehicles or fuel-efficient car rentals for business trips.

### Waste related emissions state benchmarks

| Level    | Left limit, kgCO2 | Right limit, kgCO2 |
|----------|-------------------|--------------------|
| Low      | 0                 | 10000              |
| Moderate | 10000.1           | 25000              |
| High     | 25000.1           | ∞                  |
